Aston Martin Vantage Sportshift Pump Kit 6G33-7A103-AA

★★★★★

CAD \$1,731.63

Brand new Aston Martin Vantage Sportshift pump kit , designed to uphold the highest standards of performance and reliability. This comprehensive kit includes both the pump and motor, ensuring a complete solution for your transmission system needs. Compatible with the Vantage V8 (up to 2018) models, our replacement pump offers seamless integration and precise functionality.

This unit comes with a custom CNC machined pump block. The custom machined block provides additional cooling capacity, which should add more longevity to your Aston Martin Vantage ASM system when compared to the cast pump block.

90% of pressure failures can be a result of electric motor or accumulator wear. Both the electric motor and accumulator are regular wear items and eventually wear out. We suggest changing them as part of a regular maintenance cycle.

Replacement of electric relay is highly recommended anytime there is a motor failure.
