Audi R8 Accumulator 086325585, 086-325-585, 86325585

USD \$355.09

This is a new replacement Audi R8 accumulator for your R-Tronic gearbox. Refresh your vehicle's hydraulic system with our brand new replacement accumulator. Designed to deliver reliable performance and durability, this essential component plays a critical role in ensuring optimal functionality.

The accumulator's significance cannot be overstated, as it can trigger a range of issues within the system. Its failure may lead to complications that are challenging to diagnose without specialized testing for pressure rating. When left unchecked, a faulty accumulator can place undue stress on other vital components, such as the electric motor and gear pump, hastening their wear and potentially leading to costly repairs.

Don't overlook the importance of maintaining a properly functioning accumulator. Invest in our high-quality Audi R8 accumulator replacement to safeguard your vehicle's hydraulic system against potential failures and prolong the lifespan of critical components. We recommend replacing the accumulator every 100,000 miles or every four years, whichever comes first. Trust in our expertise and commitment to quality to keep your vehicle operating smoothly and reliably for miles to come.
