Audi R8 Gear Detection Sensor 086927333B

★★★★★

CAD \$228.26

This item is a new OEM gear detection sensor for the Audi R8.

Repair your Audi R8's R-Tronic system with our premium new OEM sensor engineered to exact specifications. This kit addresses a critical component prone to wear and tear. Replacing it will ensure seamless operation and minimizing the risk of system failures.

This is an essential wear item. The gear position sensor is a vital component in the R-Tronic system. Our OEM kit provides a reliable replacement solution, ensuring optimal functionality and preventing potential system failures.

Don't wait until shifting issues arise—invest in the longevity and reliability of your Audi R8's R-Tronic system with our new OEM gear detection sensor. Trust in our quality craftsmanship and OEM precision to keep your vehicle operating at its best, mile after exhilarating mile.

The failure of gear detection sensor will cause the system to fail at different shifting scenarios and will trigger error codes that might not directly point to slave cylinder.
