Our custom-engineered BMW SMG hydraulic pump motor boasts an improved design that offers higher output and faster system prime. It is designed to deliver over 60% more output for superior performance and extended lifespan.

We offer the motor in two versions:

- **30.108: UPRATED Motor Kit**

- **30.108.X: UPRATED Motor With A New Gear Pump Section**

Made from high-grade materials, the BMW electric pump is designed to handle the extreme heat and pressure generated by the vehicle's high-performance engine. It features a compact and lightweight design, which allows it to fit easily into the OEM location.

The transmission pump is a critical component of your BMW SMG transmission system, responsible for building system pressure to allow for clutch and gear shift operations. The BMW SMG hydraulic pump upgrade kit includes a high-performance pump that will provide superior system pressure build,

The motor is physically larger than the original motor, you will need to modify the mounting bracket.
