Clutch Pressure Sensor 40 bar - Ferrari KIT CCP 7.1 40 BAR 70003860 70004021

USD \$382.41

Two of these pressure sensors (C1 and C2) are located on the DCT's mechatronics unit and monitor the hydraulic pressure at both clutches. This is a brand new and original replacement sensor.

This electric motor meets the high performance standards of Ferrari, ensuring smooth operation and durability under demanding conditions.

Regular inspection of the suspension is recommended to identify any signs of wear or malfunction, which could affect the vehicle's lifting capabilities. If you notice unusual noises, difficulty in lifting, or any fluid leaks, it is crucial to address these issues promptly to maintain safety and performance.
