USD \$81.94

This is a new replacement Dodge Dart DDCT pressure sensor. The pressure sensor is a crucial component designed to optimize the performance and reliability of your vehicle's DDCT transmission system.

Our pressure sensor will accurately measure hydraulic pressure within the DDCT system. The sensor plays a pivotal role in ensuring smooth gear shifts, precise clutch engagement, and overall system functionality.

The pressure sensor's job is to precisely measure hydraulic pressure levels within the DDCT system. This data is crucial for the system to operate efficiently and effectively, allowing for seamless gear shifts and optimal clutch engagement.

By monitoring pressure levels, it can help identify potential issues or abnormalities within the DDCT system, allowing for timely intervention and preventative maintenance.

With our new replacement DDCT pressure sensor installed, you can expect enhanced performance and reliability from your vehicle's transmission system.

Upgrade your Dodge Dart DDCT transmission system with confidence using our premium pressure sensor replacement. Engineered for durability, accuracy, and performance, it's the perfect solution for maintaining peak functionality and driving satisfaction in your vehicle.

There are two sensors on the actuator assembly.
