DSG DL501 Audi S-Tronic (0B5) Mechatronics Repair Kit

USD \$600.93

Restore your Audi to its original glory with a new DSG DL501 Audi S-Tronic (0B5) mechatronics repair kit. This new replacement kit ensures that your Audi operates as intended, delivering smooth gear shifts and reliable performance just like when it rolled off the assembly line.

This 0B5 mechatronics repair kit is designed to address common issues associated with wear and tear, ensuring smooth gear shifts and reliable performance. Whether you're experiencing slipping, rough shifting, or other transmission-related problems, this kit provides the necessary components to bring your Audi back to peak operating condition.

Included in this kit is:

- Solenoid VBS NH
- Solenoid VFS
- CVI Protection
- Insulators for VBS
- Insulators for VFS
- Screws for VBS NH
- Screws for VFS
- Lead frame 4
- Insulator MPX/ACS

The DSG DL501 Audi S-Tronic (0B5) Mechatronics valve body is used in a variety of Audi models.

Some of the models are listed below:

Make	Model	Years
Audi	A4/S4	2007-2015
