E46 M3 SMG Pump Relocation Kit

★★★★★

CAD \$196.78

The E46 M3 SMG pump relocation kit is designed to facilitate the extension of the wire harness and/or the high-pressure hoses connected to the SMG pump. This kit is specifically engineered to enable the relocation of the pump to the passenger side compartment, commonly referred to as the drug bin, within the engine bay. By moving the pump to this compartment, serviceability is significantly enhanced, providing easier access for maintenance and repairs. Furthermore, this strategic relocation moves the pump away from the excessive heat generated behind the engine in its original stock location.

Excessive heat can be detrimental to the longevity and performance of the SMG pump's components. By relocating the pump away from the high-temperature zone behind the engine, the pump is better protected from heat-related wear and tear. This ensures that the components of the SMG pump have a longer lifespan, leading to more reliable performance and reduced maintenance costs over time.

This relocation kit offers multiple options, all of which accommodate the movement of the pump to the passenger side compartment in the engine bay. The design takes into account the need for improved serviceability and the desire to enhance the durability of the SMG pump by mitigating heat exposure.

By opting for this kit, E46 M3 owners can benefit from a more accessible and efficient setup, ensuring that their vehicle's SMG pump operates optimally. The improved positioning not only facilitates easier maintenance but also contributes to the overall health and performance of the vehicle by reducing thermal stress on critical components. This makes the relocation kit an essential upgrade for those looking to preserve the functionality and reliability of their E46 M3. Options available:

- **10.203X-1: Complete Kit - Standard Length Wire Harness and Fluid Line Kit**
- **10.203X-3: Wire Harness Kit - Standard Length Wire Harness**
- **10.203X-4: Fluid Line Kit- Standard Length Fluid Line**

We also sell relocation brackets for this kit.
