## Ferrari Front Suspension Lift Electric Motor 844230

**CAD \$785.53**

This is a new Ferrari front suspension lift electric motor. This motor plays a critical role in the vehicle lift system, facilitating the lifting and lowering of the vehicle with precision and reliability.

This electric motor meets the high performance standards of Ferrari, ensuring smooth operation and durability under demanding conditions.

Regular inspection of the suspension is recommended to identify any signs of wear or malfunction, which could affect the vehicle's lifting capabilities. If you notice unusual noises, difficulty in lifting, or any fluid leaks, it is crucial to address these issues promptly to maintain safety and performance.
