Fiat 500 DCT Pump Motor 71769629 71771095

CAD \$464.39

This item is a new replacement Fiat 500 pump motor for your DCT gearbox. Refresh your vehicle's hydraulic system with our brand-new replacement motor. Designed to deliver reliable performance and durability, this essential component plays a critical role in ensuring optimal functionality.

The motor's significance cannot be overstated, as it can trigger a range of issues within the system. Its failure may lead to complications that are challenging to diagnose without specialized testing for pressure rating. When left unchecked, a faulty motor will likely result in the hydraulic pump not being able to produce pressure to activate other components within the system.

Don't overlook the importance of maintaining a properly functioning pump motor. Invest in our high-quality OEM Fiat 500 motor replacement to safeguard your vehicle's hydraulic system against potential failures and prolong the lifespan of critical components. Trust in our expertise and commitment to quality to keep your vehicle operating smoothly and reliably for miles to come.

It's essential to note that this crucial component is subject to regular wear and tear. To maintain optimal performance and longevity, we recommend replacing the motor every 5 years or 120,000 miles. By following this recommendation, you'll ensure that your Fiat DCT gearbox operates at its best for years to come.
