## Maserati 213264 Transmission Pump Upgrade

**CAD \$1,100.37**

Our custom-engineered Maserati hydraulic pump motor boasts an improved design that offers higher output and faster system prime. It is designed to deliver over 60% more output for superior performance and extended lifespan. We offer the motor in two versions:

- **80.301-1 UPRATED Motor Kit and the**
- **80.301.X-1 UPRATED Motor with a new gear pump section.**

This motor design is physically larger than the OEM version and may require slight modifications to the mounting bracket for clearance on some models. Made from high-grade materials, the Maserati electric pump is designed to withstand the extreme heat and pressure generated by the vehicle's high-performance engine. It features a compact and lightweight design, which allows it to fit easily into the tight spaces within the vehicle's engine bay. The transmission pump is a critical component of your Maserati's transmission system, responsible for building system pressure to allow for clutch and gear shift operations. The Maserati 213264 transmission pump upgrade kit includes a high-performance pump that is designed to provide superior system pressure build, We offer with gear pump complete kit or without gear pump if you just want to replace motor only. Replacement Transmission Pump for the following OEM part numbers. 213264, 247223, 178757, 247723M
