McLaren 11b0225CP Accumulator

USD \$327.78

This item is new replacement suspension McLaren accumulators for the McLaren 12C/MP4-12C. Available as a package of 4 , 2 or as single accumulators. To do a full refresh of your hydraulic suspension system your vehicle will require 4 accumulators.

Suspension accumulators are a regular wear and tear items on your vehicle . OEM suggests changing these every 3-4yrs or 15-20k miles, whichever comes first. Your driving habits and fluid conditions can affect how quickly your accumulators wear out, so you may need to replace them sooner. Symptoms of a bad accumulator or set of accumulators could be: the vehicle sinks lower to the ground, rougher ride, delayed response to steering input, breaking issues or you are seeing less fluid in your reservoir.

The MLR McLaren accumulators are designed to be a an aftermarket direct replacement to the existing accumulators in your vehicle. This is our most current design with special installation benefits as well as some performance improvements engineered to our specifications. If you are unsure of fitment please contact us with your VIN and we can help narrow down your search. This accumulator replaces the aluminum ball type accumulators.
