## Mitsubishi ACD/AYC Pump Rebuild Kit

★★★★★

**CAD \$151.13**

It's time to rebuild your ACD/AYC pump with our Mitsubishi ACD/AYC pump rebuild kit. Over time, the hydraulic pump can wear out or become damaged. We know this will lead to reduced performance or failure of the Mitsubishi ACD/AYC system. The inner pump plate helps separate the aluminum and steel elements in the pump as well as produce pressure. The OEM design typically fails due to galvanic corrosion from road salts or water ingress. We recommend frequent service of pump units every two years or 60K miles.

Included in our kit is:

- Viton seals
- A machined aluminum pump plate

Our goal is to push the boundaries of performance and reliability. Our kit not only meets but exceeds the expectations set by the original equipment manufacturer. We have thoroughly examined the current offerings on the market and can guarantee our customers that our Mitsubishi ACD/AYC pump rebuild kit will outlast both the competition and OEM products.

Note: This item is designed for all Mitsubishi's Evo 4 to 10 (IV, V, VI, VII, VIII, IX, and X) models and Lancer Ralliart with the ACD/AYC option.
