Mitsubishi Evo X AYC/ACD Differential Pump 3520A071 3520A066 3520A072

CAD \$2,754.87

We are now offering rebuilt Mitsubishi Evo X AYC/ACD differential pumps. These are new OEM pumps and are direct from the factory.

Model	From Year	To Year
Lancer	2008	2015

A full overhaul and rebuild service for Mitsubishi Lancer Evo X AYC/ACD differential pump will be done by our expert technicians. Services and products included are:

- New upgraded hydraulic motor
- New OEM accumulator
- New pressure sensor
- New seals throughout
- New pressure plate
- Fully bench tested once assembled
- Ultrasonic cleaning of all components

The rebuilt AYC/ACD differential pump is warrantied and as part of this coverage it is mandatory that you change the relay responsible for turning the pump on and off. If you have previously had a failure with the motor it is important that you change the relay, not doing so could cause erratic switching on/off times of pump and lead to damage of new components. Related Part Numbers:

- 3520A071
- 3520A045
- 3520A066
- ACD pump
- AYC pump
