This is a new replacement Porsche PDK 7DT-45 transmission pressure sensor. The pressure sensor is a crucial component designed to optimize the performance and reliability of your vehicle's PDK transmission system.

Our pressure sensor will accurately measure hydraulic pressure within the PDK system. The sensor plays a pivotal role in ensuring smooth gear shifts, precise clutch engagement, and overall system functionality.

The pressure sensor's job is to precisely measure hydraulic pressure levels within the PDK system. This data is crucial for the system to operate efficiently and effectively, allowing for seamless gear shifts and optimal clutch engagement.

By monitoring pressure levels, it can help identify potential issues or abnormalities within the PDK system, allowing for timely intervention and preventative maintenance.

With our new replacement PDK pressure sensor installed, you can expect enhanced performance and reliability from your vehicle's transmission system.

Upgrade your Porsche PDK 7DT-45 transmission system with confidence using our premium Porsche pressure sensor replacement. Engineered for durability, accuracy, and performance, it's the perfect solution for maintaining peak functionality and driving satisfaction in your vehicle.

Depending on your Porsche there are up to 3 sensors measuring the hydraulic pressure of each clutch assembly.
