Rebuilt Dodge Dart Transmission Pump DDCT 68211428AA

CAD \$1,338.07

The DDCT control unit is a hydraulic pump used in Dodge vehicles with dry dual-clutch transmission (DDCT). This rebuilt Dodge Dart Transmission Pump is a remanufactured version of the original pump that has been restored to its original specifications and performance standards.

This is a full overhaul and rebuild service for hydraulic unit. Services and products included are:

- New hydraulic motor
- New accumulator
- All seals replaced
- Ultrasonic cleaning of all components
- Bench tested for pressure retention

During the rebuilding process, the DDCT pump is disassembled, thoroughly cleaned, and inspected for damage or wear. Any damaged or worn parts are replaced with new or refurbished components, and the pump is reassembled and tested to ensure proper functioning. A core fee of \$150 has been included in price.
