Rebuilt Porsche PDK Transmission Valve Body 9G131701510

CAD \$1,967.77

Restore your Porsche to its original glory with a brand-new PDK transmission valve body. This replacement valve body is directly from the manufacturer, ensuring seamless gear shifts and optimal performance, just like when it first rolled off the assembly line.

The valve body is a crucial component in the PDK transmission system. It controls the flow of transmission fluid and regulates the gear shifting and clutches. The valve body and solenoids work to ensure smooth and precise gear shifting.

Experience the joy of effortless gear changes and the confidence that comes with a fully restored transmission. This valve body is designed to address common wear-and-tear issues, such as slipping, rough shifting, and excessive noise. Replacing the worn components with this high-quality kit, you're not just restoring your Porsche's functionality but also preserving its value and performance.

Say goodbye to the frustrations of a worn-out solenoids or valve body components. The peace of mind that comes with knowing your Porsche is operating at its peak is well worth it. With this rebuilt PDK valve body, you're investing in a reliable, durable, and OE-quality replacement that will keep your beloved Porsche running smoothly for years to come.

This is a rebuilt OEM direct replacement valve body for the factory unit, ensuring proper fit and function. We stand behind our work and offer a 1-year warranty on all of our rebuilt valve bodies. Buy with confidence knowing that you're getting a quality product that will last.

Please contact us with your VIN so that we can check fitment.
