SMG III pump Relay 61366901469

★★★★★

CAD \$31.48

New BMW replacement relay. Due to common motor failure that might effect internal contacts and cause intermittent on time as well as a severe case of continuous run on, We recommend replacing fuse to make sure motor is getting full amperage but most importantly to eliminate possibility of damaging DC motor. Note: this relay is for SMG pump that provides hydraulic pressure, not transmission cooling pump.
